## OVERVIEW

---

Results-driven Full Stack Developer with 3 years of experience designing, developing, and maintaining production web applications from front-end user experiences to backend integrations. Adept at collaborating with cross-functional teams, improving user experiences, and delivering reliable software solutions with a focus on performance, maintainability, and business impact.

## EXPERIENCE

---

Remote Associate Software Engineer | Guitar Center Corporate **July 2022 - PRESENT**

- Developed and shipped production-grade customer-facing features across multiple projects using React.js, Next.js, and TypeScript to improve performance and usability for users.
- Designed and implemented enterprise API orchestration across Salesforce and POS.
- Refactored large-scale React components into modular, reusable architectures, improving maintainability and accelerating feature delivery.
- Partnered cross-functionality with engineers, product stakeholders, and business teams to deliver customer-facing features and improve booking feature workflows.
- Performed code reviews, code quality improvements, and contributed to technical documentation.

## PROJECTS

---

WATCHLISTED - [www.github.com/watchlisted](https://www.github.com/watchlisted) [www.watchlisted.com](http://www.watchlisted.com)

- Architected and developed a scalable full-stack movie discovery platform using Next.js, TypeScript, and modern React patterns with server/client component separation for optimized rendering and performance.
- Designed an intelligent search experience supporting both traditional keyword search and AI-powered natural language movie discovery, reducing unnecessary API calls through optimized query handling.
- Integrated the Anthropic Claude API to power personalized recommendations, conversational movie guidance, and AI-generated summaries based on user preferences.
- Built secure authenticated user experiences with protected routes and full CRUD functionality for personalized watchlists, saved content, and account-based interactions.
- Integrated third-party movie and television metadata through TMDB APIs to support trending content, streaming availability, recommendations, cast details, and discovery workflows.

## EDUCATION

---

California State University Northridge  
- Bachelor Degree of Computer Science

**July 2018 – December 2020**

## SKILLS

---

**Frontend:** HTML5, CSS3, Tailwind, JavaScript (ES6+), TypeScript, React.js, Next.js, Server/Client Components, REST APIs

**Backend:** Node.js, API Orchestration, Asynchronous Workflows, SQL, NoSQL

**Cloud & Tools:** AWS, Git, GitHub, GitHub Actions, Code Review, Technical Documentation
